

## General instructions for use of MiroValve® in combination with a urine bag

1. When connecting a urine bag connector for night use, please make sure that the connector is inserted straight and axially aligned.

2. Avoid any angle when inserting the urine bag connector.

3. When disconnecting the urine bag in the morning, please make sure, not to use any circular motion during disconnection of the urine bag connector from the blue front end of the MiroValve®. Just pull the connector out straight and axially aligned.
